

## Ring- and Cone Clamp RKG

Hydraulically operated universal grab attachment for manhole rings and cones.
$\triangleright$ Using only one hydraulic circuit the clamp firstly adjusts to the inner diameter and then clamps the ring wall by 3 hydraulically operated rubber-lined gripping claws.
$\triangle$ As no radial pressure is exerted, it is possible to handle green products.
$\triangle$ Suitable for use with fork lift trucks as well as loading cranes.
(Supplied without connecting hoses to the fork lift truck).

If possible, the Ring- and Cone Clamp RKG-S 20 / S 25 should be attached to the fork lift truck with a crane boom (see pages 11.10 and 11.11 ) and a hydraulic rotator.

## Turning Device for Concrete Basers WG-S/WG-SS

Enables concrete products such as manholebasers to be turned around $180^{\circ}$ after production (turning range $360^{\circ}$ endless).
Because the products are turned at the longitudinal axle of the fork lift, there is very little extension so that the centre of gravity of the load and the device are very close to the fork lift.
Both, the gripping and turning manoeuvres are fully hydraulic.

## Standard Specifications:

$\triangle$ Grippers lined with rubber metal bars and double-hinged so that they fit the various diameters well.
(Supplied without connecting hoses to the fork lift truck).
Larger or modified opening widths are available on request.

## Gantry Crane - Rotating Clamp for Manhole Rings and Basers PWG-S

Hydraulic clamp, suitable to lift and rotate large concrete manhole rings and basers by $180^{\circ}$.
The grippers are specially adapted for manhole

## Steel Pallet Grab UMG

For lifting stacks of steel pallets and loading them into the magazine of the manhole manufacturing machine. Universally adjustable. $\triangle$ Fully mechanical operation.
rings and basers, 2 opposite surfaces without an inlet or outlet are needed.
