

# GENERATING SETS RENTAL DIVISION

# KOHLER-SDMO & BEST TOOLS COMPANY

From offshore drilling rigs to harsh desert conditions, from construction activities to the most exciting industries, KOHLER-SDMO generators have always demonstrated their performance and reliability. With the help of these powerful generators, the company has become one of the most important in the field, thus consolidating its leading position in Europe, but also the third place in the world.

Best Tools Company, exclusive dealer of KOHLER-SDMO in Romania, keeps up with the big manufacturer and offers both high performance generators in an extremely wide range for sale and rental, as well as maintenance services of the highest quality. Best Tools is a true project integrator and is focused on customer needs, renting the equipment being only the first service in a long series of solutions that beneficiaries are offered.

# WHY BEST TOOLS COMPANY?

- ▶ The latest generation of rentable generating sets
- ▶ Over 100 generating sets available for rental
- ▶ Wide range of power – between 10kVA and 1250kVA
- ▶ Quality, reliability - the entire fleet of generators is Kohler-SDMO
- ▶ Additional equipment: fuel tanks, cables, distribution panels, load bank
- ▶ Complete solutions: consulting, delivery, commissioning, 24/7 technical support throughout Eastern Europe
- ▶ All generators in the Best Tools fleet are aligned to the highest global standards regarding soundproofing, fuel consumption and exhaust emissions.

# APPLICATIONS

## CULTURAL EVENTS

Concerts • Festivals • Fairs • Meetings

## CONSTRUCTION

Power supply for equipment • Site lighting • Welding equipment • Temporary supply of energy

## MILITARY FIELD

Lights • Power supply for equipment • Military missions • Planned military exercises

## THE INDUSTRIAL SECTOR

Production plants • Power plants • Factories • Logistic warehouses

## CRITICAL APPLICATIONS

Hospitals • Data center • Emergency situations • Hypermarket chains

# EXPERIENCE & MAINTENANCE

Best Tools Company's experience in renting electric generators is a rich one. In recent years, the generating sets from our own fleet have been rented in over 3000 projects of a great diversity.

The generating sets offered for rent are regularly reviewed before being shipped from the Best Tools headquarters to the customer. Testing with the load bank is the most effective way to check the actual performance that generators can achieve or if there are any system failures.

## 24/7 SUPPORT

We focus on the customer service for the entire rental period. As a result, we offer complete professional solutions, in addition to the rental itself: pre-consulting for simple and special projects, transport, supplementary equipment (cables, external fuel tanks, distribution panels, UPS), and permanent technical support at the final location, anywhere in Romania and in the Eastern European Countries.

- ▶ Best Tools has a fleet of 15 mobile laboratories, ready to intervene at any time, anywhere.
- ▶ Best Tools technicians are trained directly by Kohler-SDMO, regularly participating in workshops and trainings organised throughout Europe.

Best Tools Company has been active in the Romanian market since 2006, accumulating during this time an important experience in the field of import and distribution of equipment and machinery, of professional equipment rental, as well as in the after-sales services.

The activity of the company is not limited to a single product range. It is actually divided into five broad categories: generating sets, sanitation equipment, waste management, cleaning equipment and construction equipment.

In recent years there has been an emphasis on innovation and the implementation of our own projects, especially in the field of waste management, thus laying the foundations of the entry of Best Tools among the manufacturers of equipment and solutions for the "smart" urban areas.
